

July 8, 2016

To: CIBMTR Medical Directors and Data Managers

From: Marcelo Pasquini
Senior Scientific Director

Subject: CIBMTR Cellular Therapy Data Registry

The world of cellular therapies is expanding. The science of infusions changes rapidly, requiring continuous review of CIBMTR forms. To better capture the new data available on cellular therapies, the CIBMTR has expanded its cellular therapy data collection forms. Over the past year, a team of experts have worked to develop the new cellular therapy forms, which will become available in the Summer Release on July 27th. These forms include:

Cellular Therapy Forms	Number
Pre-Cellular Therapy Essential Data (Pre-CTED)	4000
Cellular Therapy Infusion	4006
Post-Cellular Therapy Essential Data (Post-CTED)	4100

The new pre-CTED will function like the pre-TED in collecting pre-infusion data for cellular therapies. The F4006 will collect all cellular therapy infusion data, cellular product manufacturing information, and will be required for each infusion given per course of cellular therapy. The F4100 will collect the post-infusion follow up data. There will be different reporting schedules for infusions with non-genetically modified products versus those with genetically modified products, to help meet reporting requirements established by the FDA.

Upon initial release in July, the forms will be used to collect data on cellular therapies not related to transplant (i.e. non-DCI/co-infusion cell therapies). In late 2016, the reporting of DCI's and co-infusions will be transitioned to the cellular therapy form(s), and additional forms will be revised and developed to expand cellular therapy data collection (e.g. infection forms, disease specific inserts, etc.).

All centers are welcome and encouraged to use these forms to report data on cellular therapies performed at your center, although reporting is voluntary. In the future, the cellular therapy data will follow the same model as HCT data and will be available in our Data Back to Centers application. There will be additional communication, training, and manuals available at the time of release.

For more information or with any questions, please contact Tiffany Hunt, Program Coordinator, at thunt@mcw.edu, or by phone at 414-805-0706.

CIBMTR* is a research collaboration between the National Marrow Donor Program* (NMDP)/ Be The Match* and the Medical College of Wisconsin.
