

# COVID-19 Updates (4/10/2020)

CIBMTR began capturing data on COVID-19 positive patients on April 1<sup>st</sup> through the form 2149 data (a fillable PDF submitted via CIBMTR Center Support). This ticketing system allows for rapid review of forms, which enables daily reporting of infections known to CIBMTR.

The data reported to CIBMTR will be posted to the CIBMTR's page (<https://www.cibmtr.org/Covid19/Pages/default.aspx>) dedicated to updates on all impacts due to COVID-19.

## COVID-19 Reported Data

As of 4/9/20

<b>Number of COVID-19 Infections:</b> 9		<b>Number of Centers Reporting:</b> 7 (5 US, 2 non-US)	
1 Resolved	2 Improved	4 Ongoing	2 Died

## Frequently Asked Question:

**How do I submit the Form 2149? Or What if I have a question about Form 2149?**

A fillable PDF is available on <https://nmdp.service-now.com/csm> or [here](#). **Please only submit 1 form per ticket.**

## When should I report the Form 2149?

The form should be completed as soon as it is known when a recipient has either:

- Been diagnosed with COVID-19 (in this case, for CRF track patients also complete Q429 on the 2100, or for cell therapy patients Q181 on the 4100)

**OR**

- Died from COVID-19

If the infection is ongoing at the time of report, you will be asked to submit a second Form 2149 once the infection is resolved. When submitting these via Service Now, please indicate that these are the second form submitted for a patient.

## FormsNet Spring Release Delayed – New Date May 8th

In order to accommodate the forms changes needed to collect COVID-19 data in all appropriate sections of the CIBMTR forms, CIBMTR has extended the date of the Spring Release to May 8<sup>th</sup>.

This release will include updates to the following forms:

- PreTED, Form 2400 revision 7 - form will be revised to include three questions about COVID-19 infections that happened prior to infusion.
- CTED, Form 4000 revision 6 will be updated to include three questions about COVID-19 infections that happened prior to infusion.
  - Note that existing 4000s that were completed between Jan 24 and May 8 will need these questions answered when the form is edited.
- Post\_TED, Form 2450, revision 5 (released in January 2020) will be updated to include two questions about COVID infection.
  - Note that existing 2450s that were completed between Jan 24 and May 8 will need these questions answered when the form is edited.
- Recipient Death, Form 2900 will be updated to include COVID-19 as a Primary and Contributing Cause of Death
- Respiratory Virus Post-Infusion Form, 2149 revision 1 will be released to FormsNet.

## Reporting Priorities

In this uncertain time, your center may be working with limited resources. CIBMTR has published previous memos about the temporary delay to CPI and the extension on late reporting for reimbursement.

- Reporting COVID-19 infections
- Submitting Consecutive Transplant Lists ([Link to Memo](#))
- Reviewing TCSA Raw Data Files and making any corrections in FormsNet ([Link to Memo](#))
- Completing one-year follow-up forms for TCSA patients
