

COVID-19 Updates (4/21/2020)

Updates to the Fillable PDF Respiratory Virus Post-Infusion Form (2149)

Recently the fillable PDF form 2149 was updated to align with changes to be implemented in FormsNet3 on Friday, May 8th. Please review the following changes listed below.

Key Fields

- The visit has been updated to “Initial” and “Follow-up”.
- The “Initial” form submission should have data reported between 7 days prior to 14 days after the date of diagnosis.
- The “Follow-up” form submission should have data reported between the date evaluation, as captured on “Initial” submission, to the date of infection resolution.

Infection Diagnosis

- Added an option to question 2 to report “other” diagnostic tests not currently listed.
- Added question 3 to specify the other diagnostic test.
- Only questions 2 - 6 are required for the “Initial” submission.

Hematological Findings

- The “Initial” form submission should have hematological values reported \pm 7 days from the date of diagnosis.
- The “Follow-up” form submission should have hematological values reported closest to the date of evaluation or death.

Therapy

- The fillable PDF now has added instances to report multiple antiviral drugs and other therapies.
- Questions 31 and 39 have been added to capture a stop date for antiviral drugs and other therapies.
- Added question 41 to capture the date of evaluation.

See instructions how to submit [here](#). Please follow directions exactly as stated to submit, this is very important.

The Virus Respiratory Post-Infusion F2149 will automatically be generated in FormsNet3 after May 8th. Centers will be reimbursed for completion of this form. The blank forms then will be made available on the [Data Collection Forms Page](#) of the CIBMTR website.

If you have any questions or concerns, please contact CIBMTR Center Support (<https://nmdp.service-now.com/csm>).
