

Forms to be Revised

Over the next month CIBMTR will begin revising the next set of data collection forms, and we would like to ask for your help.

Forms to be Revised
*2801 Request for Recipient Transfer
*4000 Pre-Cellular Therapy Essential Data Form
*4100 Cellular Therapy Essential Data Follow-Up
*4003 Cellular Therapy Product
*4006 Cellular Therapy Infusion
*3501 Pregnancy
2100 Post-HSCT Data
*2008 HCT Canceled or Delayed
*3500 Subsequent Neoplasms
*2814 Indication Form
*2450 Post-Transplant Essential Data

**Forms that will not have a review committee, but suggestions and feedback still wanted.*

The goal of the revision process is to ensure the forms are capturing all currently relevant data, particularly where new definitions or tests have been accepted for use in the field. When reviewing the forms, we also keep in mind the length and burden to data professionals. There are 2 ways in which you can contribute:

1. Submit Suggestions

Review the applicable [forms](#) and send any suggested improvements to cibmtr-form-feedback@NMDP.ORG. Suggestions can include clarification around questions, adding new data points, or reformatting the way something is captured.

2. Volunteer for Review Committee

Representation from data managers is a valuable part of the revision process. Participation on a committee includes reviewing the forms via a conference call and determining the content changes needed.

Please submit all suggestions, questions, or if you would like to volunteer to cibmtr-form-feedback@NMDP.ORG, **by August 25th, 2020**.

Provide Comments When Overriding Validations

When you are given guidance in a CIBMTR Center Support ticket to override a validation error in FN3, please reference the CSM00XXXXX ticket number in the comment field. These comments are used by the Data Quality and Validation teams and may prevent these fields from being queried in the future, or from counting as an error on an Audit.

Error

"Q5 - Specify recipient's biological relative and typing" must be answered when "Q1 - Specify the person for whom this typing is being done (Recipient's biological relative)" equal "Recipient's biological relative"
