

Forms Now Available in FormsNet3

Audience: *International and Domestic Data Managers and Medical Directors*

Revised Forms

The CIBMTR is excited to announce that a new set of revised forms have been released and are now in production as of **Friday, October 23rd, 2020**. The forms include:

Forms
2402 R6 – Pre-Transplant Essential Data: Disease Classification
2028 R3 – Aplastic Anemia Pre-Infusion
2128 R3 – Aplastic Anemia Post-Infusion
2018 R6 – Hodgkin and Non-Hodgkin Lymphoma Pre-Infusion
2000 R6 – Recipient Baseline
2100 R6 – Post-HCT Follow-Up

These forms have been revised to ensure they are capturing currently relevant data, particularly where new definitions or tests have been accepted for use in the field.

Additionally, as part of the transition to using Global Registration Identifier for Donors (GRID), NMDP Donor ID will be removed from the current revisions of the recipient and donor forms that collect this ID. This is in compliance with WMDA's requirement to report the GRID as the primary identifier for all donors. Search functions within the Donor area of FormsNet3 will continue to provide the ability to locate forms using the NMDP Donor ID.

The blank forms are available on the [Data Collection Forms page](#), and the summary for the Release Highlights are available on the [Upcoming Formsnet3 Releases page](#). The corresponding [Forms Instruction Manual](#) sections for these forms are updated and available in the CIBMTR Forms Instruction Manual. If your center has feedback regarding the forms or manuals, please contact CIBMTR Center Support.
