Forms Scheduled for Release in FormsNet3

Audience: International and Domestic Data Managers and Medical Directors

Revised Forms
CIBMTR is excited to announce the next set of revised forms are planned for release in FormsNet3 on **Friday, January 22, 2021**. The revised forms include:

<table>
<thead>
<tr>
<th>Forms</th>
</tr>
</thead>
<tbody>
<tr>
<td>2400 R8 – Pre-Transplant Essential Data</td>
</tr>
<tr>
<td>4000 R7 – Cellular Therapy Essential Data Pre-Infusion</td>
</tr>
<tr>
<td>4003 R4 – Cellular Therapy Product</td>
</tr>
<tr>
<td>4006 R5 – Cellular Therapy Infusion</td>
</tr>
<tr>
<td>4100 R6 – Cellular Therapy Essential Data Follow-Up</td>
</tr>
<tr>
<td>3501 R2 – Pregnancy Form</td>
</tr>
<tr>
<td>2801 R5 – Request for Recipient Transfer</td>
</tr>
</tbody>
</table>

**Release Information**
To preview the forms and review high level changes you can anticipate, navigate to “Upcoming FormsNet3 Releases” [here](#). Along with the newly revised forms, the corresponding Forms Instruction Manual sections are being updated and will also be posted to the link above as they are completed.

As sections of the Forms Instruction Manual are updated or eLearning courses are added to the website, you will receive an email alerting you to the new materials available.

**Registry Donor ID Update**
Each of the forms listed below will have the field for “Non-NMDP unrelated donor ID” updated to “Registry donor ID” per WMDA (World Marrow Donor Association) guidelines. There are no changes to the intent or how we collect the data, only a name change.

- 2400 R8 – Pre-Transplant Essential Data
- *2100 R6 – Post-HCT Follow-up Data
- *2004 R5 – Infectious Disease Markers
- *2005 R7 – Confirmation of HLA Typing
- *2006 R5 – HCT Infusion
- *2450 R5 – Post-Transplant Essential Data
- 4000 R7 – Cellular Therapy Essential Data Pre-Infusion
- 4003 R4 – Cellular Therapy Product
- *3001 R3 – Adverse Event Form
- *3010 R3 – Product Complaint Form

*indicates no form revision required

**Form Pairings**
During the revision process, changes were made to the forms with the intent that they would be completed and paired together. On the release, the following updates will be made on the center’s behalf to maintain data integrity and quality. **No action is required by the center.**

If the form is currently in DUE status:
- Cellular Therapy Product (4003) – will remain as R3 and **not** update to the new R4
Cellular Therapy Essential Infusion (4006) – will remain as R4 and **not** update to the new R5

**Consent Tool**

On January 22, 2021, a new consent tool will be released in FormsNet3 to capture the CIBMTR observational database consent for recipients. The forms 2400 and 4000 will no longer include questions capturing observational database consent. Outcomes expected from this change are to:

- Support capturing consent and recipient contact information pre-infusion, when possible
- Allow the Survey Research Group (SRG) to approach patients for pre-infusion patient-reported outcomes (PRO) surveys for clinical research

After a CRID has been created for the recipient, a new link to the consent tool will be available to report the recipient’s consent. If a consent response ("yes", "no", or "not approached") has not been reported for a recipient, users will not be able to complete the forms 2400/2402 or 4000 until a consent is reported. For existing recipients, the recipient’s latest consent will be moved to the consent tool when possible. There are some circumstances where consent will not be moved (e.g., the forms 2400/2402 are in SVD status, “not applicable” was reported on the form 4000, etc.). If you find the edit form icon for forms 2400/2402 or 4000 appears disabled after the release, please report consent within the consent tool. The edit icon will then enable and allow for form completion. The content of the consent tool can be found on the “Upcoming FormsNet3 Releases” page [here](#). Instructions with an FAQ and e-learning will be available for the consent tool with the FormsNet3 release.

If you have any questions regarding the upcoming release, please contact [CIBMTR Center Support](#).
