

Forms to be Revised

Hello,

Over the next two months the CIBMTR will begin revising the next set of data collection forms, and we would like to ask for your help. The forms to be revised include:

Forms
2014 – Myelodysplasia/ Myeloproliferative Neoplasms (MDS/MPN) Pre-HCT Data
2114 – Myelodysplasia/ Myeloproliferative Neoplasms (MDS/MPN) Post-HCT Data
2402 – Pre-Transplant Essential Data: Disease Classification (MDS/MPN Section ONLY)

Currently the forms capture information on both MDS and MPN; however, during the revision process we will be splitting the forms and separating out the diseases into two different sets of forms.

The goal of the revision process is to ensure the forms are capturing all currently relevant data, particularly where new definitions or tests have been accepted for use in the field. When reviewing the forms we also keep in mind the length of the form and burden to data professionals. There are two ways in which you can contribute:

1. Submit suggestions for form changes. To do this, please review the [forms](#) and send any suggested improvements to Stephanie Meyers and Rachael Latchana at cibmtr-form-feedback@NMDP.ORG. This can include clarification around questions, adding new data points, or reformatting the way something is captured. All suggestions will be reviewed.
2. Volunteer for a Form Revision Committee. Representation from data managers is a valuable part of the revision process. Participation on a committee includes reviewing the forms via conference call and determining the content changes needed. We expect that each disease discussion will require about three meetings but will adjust as needed. Meetings will occur throughout July and August, and the dates/times will be finalized shortly.

Please submit suggestions or questions to Stephanie Meyers and Rachael Latchana at cibmtr-form-feedback@NMDP.ORG, or volunteer for a committee by **Friday, July 5th**.
