

# Forms to be Revised

Hello,

Over the next month, the CIBMTR will begin revising the next set of data collection forms below, and we would like to ask for your help.

Forms to be Revised
2402 – Disease Classification (“Inherited Abnormalities of Erythrocyte Differentiation or Function” & “Severe Aplastic Anemia” sections ONLY)
2028 – Aplastic Anemia Pre-HSCT Data
2128 – Aplastic Anemia Post-HSCT Data

The goal of the revision process is to ensure the forms are capturing all currently relevant data, particularly where new definitions or tests have been accepted for use in the field. When reviewing the forms, we also keep in mind their length and the burden to data professionals. There are two ways in which you can contribute:

## 1. Submit Suggestions

- Review the applicable forms and send any suggested improvements to [cibmtr-form-feedback@NMDP.ORG](mailto:cibmtr-form-feedback@NMDP.ORG). This can include clarification around questions, adding new data points, or reformatting the way data are captured.

## 2. Volunteer for a Form Revision Committee

- Representation from data managers is a valuable part of the revision process. Participation on the committee includes reviewing the forms via conference calls and determining the content changes needed. We expect the discussion will require approximately three meetings to complete but will adjust as needed. Meetings will occur throughout April and May, and the dates/ times will be finalized shortly.

Please submit all suggestions or questions to Stephanie Meyers and Dani Vitali at [cibmtr-form-feedback@NMDP.ORG](mailto:cibmtr-form-feedback@NMDP.ORG), or volunteer for a committee by **March 20<sup>th</sup>, 2020**.

Best regards,  
Data Operations
