## **Subject: Funds for Forms Reimbursement**

CIBMTR periodically reviews the status of the dedicated funds we have for forms reimbursement. During the most recent review we found that there is a substantial amount of unspent funds that must be spent by September 30, 2013, the end of the National Marrow Donor Program fiscal year. We are encouraging centers to submit as many of their currently due Comprehensive Report Forms (CRF) as possible before the September 30 deadline. With your help, we can optimize the funds we have to reimburse centers for CRFs and ensure there is research level data collected on a scientifically representative sample of recipients.

We thank centers for their continued support of the CIBMTR outcomes registry. The CIBMTR research program could not be accomplished without your dedicated contributions.
