To: CIBMTR Medical Directors and Data Managers – U.S. Centers

From: Jenni Bloomquist, MS Manager, Clinical Data Quality

Subject: New Recipient CPI Requirements Coming in Fall 2021

Dear Medical Directors and Data Managers,

We hope this email finds you safe and healthy.

CIBMTR is excited to announce updated requirements to the CPI Program beginning September 2021. These enhancements will better align the requirements with the data needs of the transplant community as well as simplify the metrics tracked to improve the quality and availability of research data.

To better understand the scope of the enhancements, see the attached table which summarizes the planned changes and benefits to centers. The Data Management Guide provides additional details, including the finalized due date changes.

Implementation of the new CPI standards are planned to begin fall trimester of 2021 using a phased-in approach to allow centers time to adjust to the new requirements. Additional details will be distributed in the next few months to help centers prepare for these changes.

Thank you for the continued support of the CIBMTR research database; the CIBMTR research program is possible because of your dedicated contributions and hard work. Data Managers should submit questions via CIBMTR Center Support. Medical Directors, please email any questions to Jenni at jbloomqu@nmdp.org.
