1. Date of actual contact with the recipient to determine the medical status for this follow-up report: [ ]

2. Were chimerism studies performed post-HSCT?
   1. Yes [ ]
   2. No [ ]

3. Are chimerism laboratory reports attached to this form?
   1. Yes [ ]
   2. No [ ]

4. Were infusions from more than one donor given?
   1. Yes [ ]
   2. No [ ]

Continue with Chimerism Studies for multiple donors at question 86.

5. Specify donor gender:
   1. Male [ ]
   2. Female [ ]

Continue with Chimerism Studies for single donor at question 6.

2. No [ ]
   Continue with the signature lines at question 116.
**Chimerism Studies**

Provide date(s), method(s) and other information for all chimerism studies performed prior to date of contact (question 1).

*If performed by non-quantitative method, indicate the presence of donor or host cells by (+).

Valid Method Codes:

1. Conventional (standard) cytogenetics
2. Fluorescent in situ hybridization (FISH)
3. Restriction fragment-length polymorphisms (RFLP)
4. HLA typing
5. VNTR or STR, micro or mini satellite
90 - Other, specify:

Valid Cell Types:

1. Bone marrow (BM)
2. Peripheral blood
3. Monocytes
4. Lymphocytes, not otherwise specified (PBMC)
5. Red blood cells
6. Monocytes
90 - Other, specify:

Fax this form to your designated campus (Milwaukee 414-805-0714 or Minneapolis 612-627-5895).
