

Question 62: Date assessed:

Enter the date of the clinical/hematologic disease assessment for this reporting period. Report the date disease was detected by radiographic examination (e.g., CT, MRI, PET, or PET/CT scans). If a radiographic assessment was not performed, report the date of the office visit in which the physician clinically documented the disease relapse or progression.

Question 63: Was disease detected?

If evidence of disease was detected by clinical/hematologic methods at the time of evaluation for this reporting period, indicate “yes.”

If no evidence of disease was detected by clinical/hematologic methods at the time of evaluation for this reporting period, indicate “no.”

Question 64: What is the current disease status?

Indicate the recipient's current disease status. See [Lymphoma Response Criteria](#) for disease status definitions. Molecular or cytogenetic evidence of disease should not be considered when answering this question.

Question 65: Date assessed:

Enter the date of the most recent assessment of disease status for this reporting period. Report the date imaging (CT, MRI, PET, or PET/CT) took place. If no radiographic assessment was performed, report the date of the most recent office visit in which the physician assessed the recipient's disease status.

If the exact date is not known, use the process for reporting partial or unknown dates as described in [General Instructions, Guidelines for Completing Forms](#).
