OVERVIEW

The first BMT Tandem Meetings were held in 1995. Because of a significant overlap in constituency, the CIBMTR and the ASBMT combined their annual meetings to allow participants to optimize time and travel funds by attending two meetings in one week. By combining the meetings, over 3,500 participants are expected, with approximately 18% from outside the United States. Historically, about 47% of attendees are physicians (MDs) and researchers (PhDs), 16% nurses, 7% advanced practice professionals, 6% clinical data coordinators, and 5% pharmacists.

MEETING HISTORY

CIBMTR

The Center for International Blood and Marrow Transplant Research (CIBMTR), a research collaboration between the National Marrow Donor Program® (NMDP)/Be The Match® and the Medical College of Wisconsin, provides a unique resource of data and statistical expertise to the scientific community for addressing important issues in hematopoietic cell transplantation (HCT). It is comprised of a worldwide network of HCT centers that share data on HCT outcomes and a Statistical Center that maintains a clinical database with information for over 465,000 HCT recipients from over 400 transplant centers in 52 countries. The CIBMTR is a voluntary research organization of basic and clinical scientists collaborating to address important issues in blood and marrow transplantation (BMT) and cellular therapies. Active in BMT research since 1972, the CIBMTR collects information on the results of BMT and cellular therapies and uses this information to identify ways to improve transplant outcomes.

ASBMT

The American Society for Blood and Marrow Transplantation is an international professional membership association of more than 2,300 physicians, investigators and other healthcare professionals promoting blood and marrow transplantation and cellular therapy research, education, scholarly publication and clinical standards. From its beginning, ASBMT activities have been in eight broad areas, representing the interests of transplant clinicians and investigators and the patients they serve:

- Research
- Representation
- Clinical Standards
- Regulation
- Communications
- Accreditation
- Reimbursement
- Recruitment
- Training

ASBMT Scientific Program Chair

Jerome Ritz, MD
Harvard Medical School

The BMT Tandem Meetings include scientific sessions, poster sessions, symposia and workshops on a wide variety of current issues in allogeneic and autologous transplants, and cellular therapies, including parallel conferences for advanced practice professionals, transplant nurses, BMT clinical research associates, BMT pharmacists, BMT administrators, as well as special sessions for pediatric physicians, medical directors and fellows-in-training.

EDUCATIONAL OPPORTUNITIES

CREDIT

Continuing Medical Education (CME) for physicians and contact hours for allied health professionals will be provided by the Medical College of Wisconsin. Nursing and pharmacy credits will also be available for some sessions.

OBJECTIVES

Upon completion of this CME activity, participants should be able to:

- Report on the state of the art in cellular therapy and blood and marrow transplantation;
- Analyze new methods and controversial issues in clinical management strategies for reducing toxicity and improving transplant and cellular therapy outcomes;
- Assess new basic science information in the areas of immunogenetics, molecular biology, stem cell biology and immunology as it relates to hematopoietic stem cell transplantation;
- Review CIBMTR research accomplishments and set the scientific agenda for next year;
- Review accomplishments of ASBMT, including progress on organizational, societal and regulatory issues in blood and marrow transplantation, and novel cellular therapies;
- Report on contemporary principles in BMT nursing, pharmacy, data management, clinical research analysis, pediatric transplantation and transplant center administration.
