SAVE MONEY
Order early on FreemanOnline to take advantage of advance order discount rates, place your order by January 12, 2022.

AVOID DELAY
Ship early to avoid delays. Shipments arriving late at show site will cost you money, time and business!

SAFETY TIPS
Use a ladder, not a chair. Standing on chairs, tables and other rental furniture is unsafe and can cause injury to you or to others. These objects are not designed to support your standing weight.

Be aware of your surroundings. You are in an active work area with changing conditions during move-in and move-out. Pay attention. Look for obstacles, and machinery and equipment that are in use.

Keep your eyes open for scooters and forklifts. The drivers of these vehicles may not be able to see you.

Stay clear of dock areas, trucks and trailers. These areas can be particularly dangerous.

Prevent electrical shocks, falling items and damage to materials. Do not attach items or equipment to the drapes or metal framework provided for you booth. This can cause serious injury or damage to materials.

We discourage children from being in the exhibit hall during installation and dismantle. If children are present during installation and dismantle, they must be supervised by an adult at all times.

Freeman does not ship or handle Hazardous Materials. If any materials you are shipping to the event fall into this category, please contact Freeman to be sure that the material will be allowed at the facility and by the association. In addition, if authorized by the facility and the association, you will need to make separate arrangements for the transport and handling of the approved materials, since Freeman will not transport or handle them.

The operation or use of all motorized lifts and motorized material handling equipment for installation/dismantle of exhibits is NOT permitted by exhibitors or by their exhibitor appointed contractors (EACs). Thank you for your cooperation

Interested in going green and saving money?

Follow these tips to make sure your sustainable booth strategies are cost-neutral or even cost-saving! Leave an impact on the show floor, not the environment.

**BEFORE THE SHOW**

1. **booth structure**
   - **Option 1 Multiple Use**
     Use Forest Sustainable Certified (FSC) wood to build your booth and crates.
   - **Option 2 One-time Use**
     Rent locally from nearby Freeman offices to reduce both shipping costs and carbon emissions. Freeman’s eye-catching stretch-fabric booth designs pack up small (and light!) for shipping.

2. **carpet**
   - **Option 1 Rent**
     Rent rather than buy carpet to save on shipping, cleaning, and storage. Freeman Classic carpet can be reused at least four times.
   - **Option 2 Color**
     Use darker-colored carpet, which is easier to reuse and recycle. Freeman Classic dark-colored carpets are made of 20-50 percent recycled content.

3. **shipping**
   - **Online + before deadline = better bottom line.** Take advantage of early-bird pricing and consolidate shipping when ordering supplies.
   - **Choose reusable shipping padding.** Avoid packing peanuts and foam plastic materials that never decompose.
   - **Ship early.** Use the 30-day policy to ship materials to the Freeman advance warehouse.

4. **graphics**
   - **Option 1 Multiple Use**
     Print on a durable substrate without dates, event names, or locations.
   - **Option 2 One-time Use**
     Print on 100 percent recyclable materials like Freeman Honeycomb and Smartbuild Eco, which are just as cost-effective as PVC.

5. **print on at least 50 percent post-consumer recycled paper.**

   **Reduce printing and go digital with your booth literature.**

   **Print locally.** Supporting local businesses while reducing shipping? It’s a win-win.
**ON SITE**

**save energy**

- Use Energy Star-rated equipment for audio-visual equipment and monitors.
- Power down. Turn off equipment at the end of each day.
- Light up your booth with CFLs, LEDs, or other energy-efficient lighting.

---

**MOVE OUT**

**train your team**

Educate your installation and dismantling teams about recycling and donation processes.

---

**shipping out**

Pack in, pack out.
Leave no traces on show site.

Join a caravan.
If you’re shipping directly to another show, ask Freeman Transportation about joining a caravan to your next show.

---

**leftover materials**

Remember to label.
Clearly label recyclable leftover material for disposal.

Donate the rest.
Ask the Freeman Exhibitors Services desk about local donation programs.

---

**TYPICALLY**

**RECYCLABLE**

- Cardboard: Used for signs or shipping boxes
- Glass: Green, brown, clear
- Plastics: Shrink-wrap or plastic banding used to secure shipments; water/soda bottles; plexiglass (acrylic) clear, smoked, or tinted; Visqueen used to protect flooring
- Metal: Aluminum cans/steel banding

**TYPICALLY**

**DONATE-ABLE**

- Furniture: Purchased items
- Home furnishing: Décor staging materials
- Unused raw materials: Plywood, subflooring, non-laminate wood
- Flooring: 100 square feet of flooring. Excludes carpet.
- Left over giveaways: Pens, pads of paper, sunglasses, USBs, etc., left over in your promotional giveaway

The Exhibitor acknowledges and agrees that the Tandem Meetings, its employees and contractors may take photographs/videos, which could include images of Exhibitor, its name and logo, its representatives and its exhibits while attending the Exhibition. Exhibitor hereby consents to and grants to the Tandem Meetings and its affiliates, the unrestricted, perpetual, worldwide, royalty-free and transferable right and license to use (and grant others the right to use) the images worldwide without any compensation. Exhibitor acknowledges that the Tandem Meetings is the sole and exclusive owner of all rights in the images and hereby waives (a) any and all rights in and to such images, and (b) any and all claims Exhibitor and its representatives may have relating to or arising from the images or their use.

(q) Music in the booth or at any of Exhibitor’s function held in conjunction with the Event is subject to applicable copyright and licensing fees. It is the sole responsibility of the Exhibitor to pay applicable fees.

(r) Hanging signs are permitted in all peninsulas, modified peninsulas, split islands and island booths to a maximum height of (17’) (5.18 m) to the top of the sign. Hanging signs are NOT permitted in inline or perimeter booths.

(s) All exhibit fixtures and booth structures are permitted to a maximum height of (17’) (5.18 m) in all peninsulas, modified peninsulas, split islands and island booths.

(t) In-line (Linear) Booths and Perimeter Booths: In-line Booths, also called “Linear Booths”, are generally arranged in a straight line and have neighboring Exhibitors on their immediate right and left, leaving only one side exposed to the aisle. A Perimeter Booth is a Booth that backs to an outside wall of the exhibit facility rather than to another exhibit. The maximum back wall height allowed for In-line booths is 8 feet (12 feet for perimeter booths) and must not protrude more than 5 feet from the back wall. No side rails, counters, or structure may exceed 4 feet in height within 5 feet of the front of the exhibit space. The reverse side of any wing panel extending from the back wall of the display must be draped to avoid raw exposure to a neighboring booth. Additional pipe and drape will be required at the Exhibitor’s expense for those booths that have exposed areas between the back wall of their structure and the back wall of the booth. Please note that, to provide a harmonious environment to all exhibiting companies’ sightline,
rules will be strictly enforced. If the Exhibitor does not comply, the TCT Meetings will have the general services contractor drape the area at the Exhibitor’s expense.

End-Cap (10' x 20’): The maximum back wall height allowed is 12 feet and the maximum back-wall width allowed is 10 feet at the center of the back-wall with a maximum 5-foot height on the two side aisles. No side rails, counters, or structure may exceed 4 feet in height, or be within 5 feet of each aisle. End-Cap Booths will not have the outside 3-foot side rail installed. The reverse side of any wing panel extending from the back wall of the display must be draped to avoid raw exposure to a neighboring booth. Additional pipe and drape will be required at the Exhibitor’s expense for those booths that have exposed areas between the back wall of their structure and the back wall of the booth. Please note that, to provide a harmonious environment to all exhibiting companies’ sightline, rules will be strictly enforced. If the Exhibitor does not comply, the TCT Meetings will have the general services contractor drape the area at the Exhibitor’s expense.

(u) Island Booths: An island booth is typically a 400-square-foot (20’x20’) or larger exhibit space exposed to the aisles on all four sides. Island booths must be constructed to allow access from all sides. Island booths should have open sight lines around and through the design (including structures), so that the surrounding area can be viewed through the booth and neighboring booths are not inappropriately obstructed. Please note: Multi-level exhibits are not permitted. Exhibit spaces with one side 80 linear feet or greater may not be wider than they are deep.

(v) Exceptions may be made at the Tandum Meetings’ discretion. Any part of a display, tower, or otherwise must maintain a minimum of 5 to 1 ratio of height to base of said structure and may also require a safety tie off (restraint) from above (seismic safety cables) 12-foot perimeter height rule. Exhibitors who wish to construct an island booth that will be 400 square feet or larger are required to submit a digital drawing, rendering, or architectural plans to the Tandum Meetings Conference Office by Friday, January 7, 2022. Any changes that occur after initial submission must be resubmitted to the Tandum Meetings for approval prior to the meeting. Should booth construction at the show deviate from the actual submitted and approved floor plans, the Tandum Meetings reserves the right to ask the Exhibitor to make modifications at the Exhibitor's expense.

(w) Umbrellas and canopies are considered part of the overall booth components and may not protrude into the aisle.

20. USE OF SPACE — LIGHTS/ AUDIO / VEHICLES ETC.

(a) No spotlight may be directed toward the aisles or so directed that it proves to be irritating or distracting to neighboring Exhibitors or guests.

(b) Droplights or special lighting devices must be hung at a level or positioned so as not to prove to be an irritant or distraction to neighboring Exhibitors or guests.

(c) No strobe light effects are permitted.

(d) Projectors, computer screens or TV screens must not cause people to block the aisle. Computer screens and TV screens are considered part of the overall booth components and may not protrude into the aisle.

(e) Loud speakers or operation of equipment, which is of excessive sound volume to be annoying to neighboring Exhibitors or guests is not permitted based on the 80/80 Rule: Any sound that consistently exceeds 80 decibels measured at the edge of an Exhibitor’s booth or is clearly identifiable more than 80 feet from that booth is considered objectionable.

(f) No lighting, fixtures, lighting trusses, or overhead lighting are allowed outside the boundaries of the exhibit space. All lighting should be directed to the inner confines of the booth space. Lighting should not project onto other exhibits or aisles. Exhibitors intending to use hanging light systems are required to submit a detailed floor plan with light locations and dimensions, including height, of all items in the booth, to the Tandum Meetings for review and approval by Friday, January 7, 2022.

(g) Vehicles may not be displayed without prior written approval from the Tandum Meetings and the Public Safety Department of the Facility.
21. MEETINGS & DISPLAYS OUTSIDE EXHIBIT AREA

In order to ensure the success of the Event and avoid dilution of benefits extended to all partners, Exhibitor may not extend invitations, call meetings or otherwise encourage absence of other exhibitors'/sponsors attendees from any program or other component of the Event during Exhibit Hours or any function sponsored in connect with the Event without prior notice to and approval by the Tandem Meetings.

25. LABOR RELATIONS

(a) Full-time employees of Exhibitor may set up Exhibitor’s own exhibits without assistance from the local union. Any labor services that may be required beyond what Exhibitor’s regular full-time employees can provide must be rendered by union personnel and can be ordered in advance through Freeman. Proof of full-time employment status may be requested by the Union Steward of any personnel working in Exhibitor’s booth.
(b) Exhibitor may hand carry its own materials into the exhibit facility. The use or rental of dollies, flat trucks and other mechanical equipment, however, is not permitted. Should any provision be held unenforceable for any reason, then such provision shall be enforced to the maximum extent permitted by law.

This Contract will be binding on the Exhibitor’s heirs, successors and assigns.

SHOW # (505769)
WHAT ARE FREIGHT SERVICES?

As the official service contractor, Freeman is the exclusive provider of freight services. Material handling includes unloading your exhibit material, storing up to 30 days in advance at the warehouse address, delivering to the booth, the handling of empty containers to and from storage, and removing of material from the booth for reloading onto outbound carriers. It should not be confused with the cost to transport your exhibit material to and from the convention or event. You have two options for shipping your advance freight — either to the warehouse or directly to show site.

HOW DO I SHIP TO THE WAREHOUSE?
• We will accept freight beginning 30 days prior to show move-in.
• To check on your freight arrival, call Exhibitor Services at the location listed on the Quick Facts.
• To ensure timely arrival of your materials at show site, freight should arrive by the deadline date listed on the Quick Facts. Your freight will still be received after the deadline date, but additional charges will be incurred.
• The warehouse will receive shipments Monday through Friday, except holidays. Refer to the Quick Facts for warehouse hours. No appointment is necessary.
• The warehouse will accept crates, cartons, skids, trunks/cases and carpets/pads. Loose or pad-wrapped material must be sent directly to show site.
• All shipments must have a bill of lading or delivery slip indicating the number of pieces, type of merchandise and weight.
• Shipments received without receipts or freight bills, such as Federal Express and UPS, will be delivered to the booth without guarantee of piece count or condition.
• Certified weight tickets must accompany all shipments.
• Warehouse freight will be delivered to the booth prior to exhibitor set up.

WHAT ABOUT PREPAID OR COLLECT SHIPPING CHARGES?
• Collect shipments will be returned to the delivery carrier.
• To ensure that your freight does not arrive collect, mark your bill of lading “prepaid.”
• “Prepaid” designates that the transportation charges will be paid by the exhibitor or a third party.

HOW SHOULD I LABEL MY FREIGHT?
• The label should contain the exhibiting company name, the booth number and the name of the event.
• The specific shipping address for either the warehouse or show site is located on the Quick Facts.

HOW DO I ESTIMATE MY MATERIAL HANDLING CHARGES?
• Charges will be based on the weight of your shipment. Each shipment received is billed individually. All shipments are subject to reweigh.
• On the Material Handling Form, locate the rate that applies to your shipment and multiply that rate by the weight of your shipment in pounds.
• The above services, whether used completely or in part, are offered as a package and the charges will be based on the total inbound weight of the shipment.

WHAT HAPPENS TO MY EMPTY CONTAINERS DURING THE SHOW?
• Pick up “Empty Labels” at the Freeman Service Center. Once the container is completely empty, place a label on each container individually. Labeled empty containers will be picked up periodically and stored in non-accessible storage during the event.
• At the close of the show, the empty containers will be returned to the booth in random order. Depending on the size of the show, this process may take several hours.

Call customer service at the number listed on the Quick Facts. For fast, easy ordering, go to freeman.com
HOW DO I PROTECT MY MATERIALS AFTER THEY ARE DELIVERED TO THE SHOW OR BEFORE THEY ARE PICKED UP AFTER THE SHOW?

• Consistent with trade show industry practices, there may be a lapse of time between the delivery of your shipment(s) to your booth and your arrival. The same is true for the outbound phase of the show — the time between your departure and the actual pick-up of your materials. During these times, your materials will be left unattended. We recommend that you arrange for a representative to stay with your materials or that you hire security services to safeguard your materials.

HOW DO I SHIP MY MATERIALS AFTER THE CLOSE OF THE SHOW?

• Each shipment must have a completed Material Handling Agreement in order to ship materials from the show. All pieces must be labeled individually.
• To save time, complete and submit the Outbound Shipping Form in advance, or you may contact the Freeman Service Center at show site for your shipping documents.
• Once we receive your outbound shipping information we will create your Material Handling Agreement and shipping labels. If the shipping information is provided in advance, the Material Handling Agreement will be delivered to your booth with your invoice. Otherwise the Material Handling Agreement and labels will be available for pick up at the Freeman Service Center.
• After materials are packed, labeled, and ready to be shipped, the completed Material Handling Agreement must be turned in at the Freeman Service Center.
• Call your designated carrier with pick-up information. Please refer to the Quick Facts for specific dates, times and address for pick up. In the event your selected carrier fails to show by the final move-out day, your shipment will either be rerouted on Freeman’s carrier choice or delivered back to the warehouse at the exhibitor’s expense.
• For your convenience, approved show carriers will be on site to book outbound transportation if you have not made arrangements in advance.

WHERE DO I GET A FORKLIFT?

• Forklift orders to install or dismantle your booth after materials are delivered may be ordered in advance or at show site. We recommend that you order in advance to avoid additional charges at show site. Refer to the Rigging Order Form for available equipment.
• Advance and show site orders for equipment and labor will be dispatched once a company representative signs the labor order at the Freeman Service Center.
• Start time is guaranteed only when equipment is requested for the start of the working day.

DO I NEED INSURANCE?

• Be sure your materials are insured from the time they leave your firm until they are returned after the show. It is suggested that exhibitors arrange all-risk coverage. This can be done by riders to your existing policies.
• All materials handled by Freeman are subject to the Terms and Conditions, which can be found in the exhibit service manual or online at www.freeman.com.

Comfortable and Safe Networking

Meaningful engagement doesn’t have to be complicated. Networking and connecting with peers face-to-face is a key objective of attending in-person events. Delivering environments which facilitate both ad-hoc and in-depth networking is important in accommodating attendee needs and will allow attendees to connect with peers effectively, comfortably, and safely.

To help you feel confident as you begin to plan your in-person and hybrid events, we have developed Freeman SafeConnect. This program includes standards, protocols, and service offerings that reflect our values and commitment to safety and wellbeing — for our people, our customers, and our attendees.

Top Design Tips

for Tradeshow Booths.

1. Spin Around. Swivel chairs in small spaces maximize functionality and allow you to engage with those all around!

2. Get Connected. Communal tables help facilitate networking opportunities and build connections.

3. Creature Comforts. Design a comfortable “living room” space with soft lounge seating to relax clients and encourage conversation.

4. Keep it Green. Don’t forget the greenery to warm up your booth environment by bringing nature indoors.

5. Demo Down. Square or circular ottomans are a great way to design small theaters for quick demonstrations.

6. Level the field! Low and casual seating makes clients more comfortable and open to learning.

7. Stay Social. Style furnishings to create shareable moments worthy of Instagram.

8. Gather Round! Ottomans styled around a side table create an informal campfire setting for small group discussions.

9. Charge it! Powered tables and seating encourages clients to linger in the booth and recharge.

10. Provide a Pop! Colorful furnishings attract attention and help reinforce brand themes.

**Strategic planning with health & safety in mind**

Health & Safety are the top priorities as we consider new designs and ways to connect. When those are clearly emphasized on the show floor, attendees will feel more confident re-engaging.

Together, let’s imagine what this new experience will look like - based on both what is possible and realistic. Some recommendations may be new to you. Some, not. To get you started, our top five recommendations include:

- Strategize your audience approach
- Re-imagine your booth design.
- Evaluate a hybrid booth approach
- Create safe networking opportunities during the show
- Stay connected to your audience post-show

In all cases, we’ve put considerable thought into them.

CUSTOMER GUIDELINES FOR SUBMITTING GRAPHICS ARTWORK

Our goal is to provide you with the best possible quality graphics for your event or exhibit. You can help us in that effort by providing digital art files using the following guidelines. If you are sending us completed, print-ready files, please pass the following information on to your graphics designer or art department. Artwork must be submitted in the proper resolution and/or file size to produce quality images. Please provide proper color matching information and proofs to ensure accurate color reproduction.

PLEASE PROVIDE THE FOLLOWING WHEN SUBMITTING ART

RASTER ART (photos, logos containing any continuous tone images):
• Art submitted at 1:1 (100%), resolution should be no less than 60 dpi (100 dpi preferred)
• Art submitted at 2:1 (50%), resolution should be no less than 120 dpi (200 dpi preferred)
• Art submitted at 4:1 (25%), resolution should be no less than 240 dpi (400 dpi preferred)

VECTOR ART:
• Logos should be vector and have outlined fonts (if provided as bitmap, please use high-res images)

FONTS and LINKS
• Supply all fonts used in your design (zip Mac fonts). If unsure how to collect fonts, convert them to outlines
• Supply all links used in your document. Use packaging feature if available. If unsure how to collect links, embed them in the file when saving.

COLOR
• If PMS color matching is required, please use original Pantone + Solid Coated swatches in your artwork. Modifying Pantone names will result in printing default color (CMYK)
• CMYK artwork will be produced "As Is". Our color output is balanced and vibrant.
• Convert RGB art to CMYK if possible.
• If you are sending Certified Color Proofs (Gracol, Swop, Fogra), please provide ICC file information used to print your samples. Best option would be to include ICC chart on your prints.

ARTWORK IN THE STRUCTURE
• Please note that any panels going in the metal frame will hide 1/4" of your art all the way around. If you have a continuous wall where individual panels are divided by metal, use 1.25" spacing in between each panel to account for gaps and the natural flow of the graphics.

ACCEPTABLE FILE SOFTWARE

We are capable of working with both PC and MAC based software, and can accept art created with the ADOBE Creative Suite - Illustrator, InDesign, and Photoshop

Always provide the following:
• Native files with fonts and links (zipped)

LABOR JURISDICTIONS / SALT LAKE CITY

To assist you in planning for your participation in your Salt Lake City show, we are certain you will appreciate knowing in advance that union labor may be required for certain aspects of your exhibit handling. To help you understand the jurisdiction the various unions have, we ask that you read the following:

LABOR SOURCE

We currently have a labor agreement with IATSE Local #838 to provide labor for display installation and dismantling. Full time employees of the exhibiting companies, however, may set their own exhibits without assistance from the local. Any labor services that may be required beyond what your regular full time employees can provide must be rendered by the Local. Labor can be ordered in advance by returning the Labor Order Form, or on show site at the Freeman Service Desk.

MATERIAL HANDLING

Exhibitors may hand-carry their own materials into the exhibit facility. The use or rental of dollies, flat trucks and other mechanical equipment, however, is not permitted. Freeman will control access to the loading docks in order to provide for a safe and orderly move-in/out.

TIPPING

Freeman requests that exhibitors do not tip our employees. They are paid at an excellent wage scale denoting a professional status, and we feel that tipping is not necessary. This applies to all Freeman employees. Any request for such should be brought to the attention of a Freeman Representative at the Freeman Service Desk or correspondence may be directed to the attention of the General Manager at the local office address.

SAFETY

Standing on chairs, tables or other rental furniture is prohibited. This furniture is not engineered to support your standing weight. Freeman can not be responsible for injuries or falls caused by the improper use of this furniture. ELECTRICAL SERVICES

From under carpet wiring to overhead lighting, Freeman has the power to simplify your electrical needs and installation. We’ve answered your most common questions below to help you place your order or prepare for a detailed discussion. Whether you require basic household/office power or a more technical installation for equipment, audio-visual presentations or truss lights, our electrical specialists and qualified electricians are always available to assist you.

How do I know how much power I need?

First, review a layout of your exhibit, noting all of the items in it that require power. Consider lighting, computer equipment, and your own product. Are you bringing or renting any a/v equipment or ordering catering services that might need power? Will you be using a lead retrieval machine? If it’s an item that plugs into a standard wall outlet found in a home or office (in North America), it will require 110/120 volt power. 208 or 480 volt power is generally used for machinery or industrial cooking devices and is ordered by single or 3 phase.

Next, mark the voltage and wattage or amperage (referred to as “load”) (100 watts = 1 amp) of each piece of equipment at its location in the booth. This information should be provided on a name plate or stamp usually located on the back or bottom of the equipment. If not indicated, check our accompanying electrical usage guide for estimated wattages for common items used at trade shows or call your rental company/caterer for specifics. For lighting, loads are dictated by the wattage of the bulbs. Arm lights included with Freeman exhibit packages use 200 watt bulbs. Keep in mind that you need to order power for any lighting within your booth unless the lights are ordered directly from the Electrical Department (those listed on the Freeman electrical order form).

Finally, total the wattage for the 120 volt devices in each area and select an outlet that meets or exceeds that total. Separate outlets should be ordered for each piece of equipment and/or each power location to help minimize tripping/power outages. It is always safer to slightly overestimate your power requirements. Wattage or amperages cannot be combined for 208 or 480 volt apparatus. Please order separate outlets for each.

Do I need to order labor?

As the official service contractor, electrical installations must be performed by Freeman union labor. Labor is required for any electrical work over and above the delivery of outlets to the back wall of inline booths. Labor orders will automatically be input upon receipt of an electrical layout for under carpet installation (floor work) or to connect any 208 volt or higher services (hook up). Dismantle labor for electrical services is calculated at 50% of the installation time since much of the work is performed on a mass basis after booths are removed from the exhibit hall. Please see the electrical labor order form for further details, rules and regulations.

What is an electrical layout and why do I need one?

Like your own home, electrical boxes and wiring should not be visible once the exhibit is completed. At show site, they are the first things to be installed so that they can be hidden by drape, walls or counters and under flooring or carpet. Electricians, therefore, work on a blank slate. A good electrical layout or floor plan provides them with a simple overhead view of your booth indicating the locations and load of each electrical outlet and the orientation of your booth within the show itself. The layout should be to scale and provide specific measurements to each outlet along with surrounding aisle or booth numbers to ensure accuracy. For island booths, a main power location must also be indicated as it is the location from which other outlets are fed. Please see the sample layouts and electrical grid for further information.

When a layout and credit card are provided in advance, Freeman makes every effort to ensure that the floor work is completed before you arrive so that there is no delay in assembling your booth. Once carpet is laid, installing or changing electrical services becomes much more difficult and potentially costly. Please note that layouts, complete with mandatory information, are required prior to the deadline date for electrical orders to be eligible for advance rates. Layouts are not required if all outlets are located at the back wall in inline booths.

Is the price for power per day?

Outlet or connection prices are typically for an entire show.

What is 24 hour power?

Many facilities these days are energy conscious and therefore turn off power overnight during show days. Power is turned off 1/2 hour after the show closes at the earliest and restored no later than 1/2 hour before the show opens the following day. 24 hour power is, as it sounds, power that is continuously on 24 hours per day.

If your booth includes, for example, refrigeration equipment, an aquarium or programmable apparatus that depends on uninterrupted power, you should consider ordering 24 hour service. Power is usually not turned off during move-in or move-out.

Where does the power come from?

Depending on the facility, the power can come from overhead catwalks, floor ports, columns, wall outlets or a combination of these sources. Check with the local Freeman branch office for more information.

Where will my power be located?

In-line and peninsula booths will find their main power source on the floor somewhere along the rear drape line of their booth. Island booths need to submit an electrical layout. Please see the sample layouts and electrical grid for further information.

What if I need power at another location besides the rear of my booth? What if I have multiple power locations?

Exhibitors requiring power at any location other than a back wall must submit an electrical layout. Please see the sample layouts and electrical grid for further information.

How many places will I have to plug in? How many things can I plug in?

For planning purposes, you should always assume that there is only one connection point per outlet ordered. Power strips can provide additional sockets but do not confuse having more places to plug in with additional power. For example – An order is placed for a 500 watt outlet. A track light with 4 – 100 watt bulbs is plugged in to a power strip connected to the outlet, using 400 of the 500 watts. Any lighting or equipment now plugged in to a second socket may not exceed 100 watts.

Also keep in mind that power strips are designed, for safety purposes, to trip at 1500 watts or 15 amps. Using a power strip with a 2000 watt (20 amp) outlet will reduce it to a 1500 watt outlet.

All orders exceeding 120 volt/20 amps provide one connection point only, cannot accommodate power strips and require labor for installation.
Can I bring my own extension cords and power strips? (Also known as plug strips, multi strips, etc.)
Exhibitors may use their own extension cords and power strips under the following conditions:
- The equipment must be 3 wire, 14 gauge minimum with a ground.
- The extension cords must be flat if they are to be laid under carpet. (Labor is required to lay the cords.)
- All power strips must have circuit protection.

Can I run my extension cords under the carpet myself?
For safety reasons, exhibitors are not allowed to run any electrical wiring under any type of floor covering or where they may be concealed in the booth structure. The show’s electrical contractor is liable for electrical installations and therefore must perform all floor or booth work.

Will my floor work be completed before I arrive?
Every attempt is made to have floor work completed prior to carpet installation if you have submitted the following:
- A completed electrical order form.
- A valid and authorized credit card to be kept on file for the company.
- An electrical layout indicating the main power location, dimensions to each power location, the power required at each location, and surrounding aisle or booth numbers to determine orientation of the booth.

Labor and material charges apply.

When will my power be turned on?
Power is only guaranteed to be installed before the show opens. If Freeman is allowed early access to the facility, power is normally ready the first day of move-in for exhibitors but any special requests such as temporary chain motor power, programming machinery or testing equipment should be noted on your order.

Do I need lighting?
Lighting can dramatically change the impact of an exhibit, no matter the size. Used effectively, lighting can emphasize specific areas of a booth or highlight products. Also, an exhibit will appear dark and uninviting if the surrounding booths are lit and yours is not.

Can I hang my own lights?
10 x 10 booths with pop-up displays (a display that can be assembled in less than 30 minutes without tools) can hang their own lights and plug them in without ordering labor. Typically, exhibitors themselves can hang up to 4 lights as long as they require no more than 20 amps in total but it is best to clarify with the local branch. If a decorating company (including Freeman) has been contracted to install a display, electrical labor is required to install the lights. Due to union contracts, no other union is allowed to install electrical equipment.

Do I need to order power for my lighting?
Exhibitors ordering Electrical Services lighting (those listed on the Freeman electrical order form) do not need to order power. It is included in the rental. Exhibitors supplying their own lighting or renting lights need to order power. Labor may be required to hang the lights.

Can I bring my own extension cords and power strips? (Also known as plug strips, multi strips, etc.)
Exhibitors may use their own extension cords and power strips under the following conditions:
- The equipment must be 3 wire, 14 gauge minimum with a ground.
- The extension cords must be flat if they are to be laid under carpet. (Labor is required to lay the cords.)

Exhibitors ordering Electrical Services lighting (those listed on the Freeman electrical order form) do not need to order power. It is included in the rental. Exhibitors supplying their own lighting or renting lights need to order power. Labor may be required to hang the lights.

How can I save money and frustration when ordering electrical services?
Most importantly, be sure to submit your order before the discount price deadline date. If an electrical layout is needed, it also must be received, complete with mandatory information, before the deadline date to be eligible for discount pricing. Late orders can be subject up to a 50% increase in cost because of the behind-the-scenes planning required to distribute power.

Don’t underestimate your power requirements and work within the local rules, regulations and union jurisdictions. They have been implemented to avoid problems. While it may seem simple to plug in lights and equipment, it is not uncommon for exhibit or non electrical staff to overload circuits. Trouble calls can become expensive when it takes time to find the source of a problem.

If unsure about labor, call us for direction and if necessary, place a “will call” order before the discount price deadline date. You will only incur a charge if labor is dispatched to your booth but you’ll have secured the advance pricing. And, check in with the electrical or service desk as soon as you know you need labor, not at the time you want the electricians in your booth. It will help to avoid delays as we can schedule accordingly.

Lastly, try to resolve any disputes at show site. It is much easier to discuss electrical issues when both parties can physically review the installation.

Additional questions?
Call customer service at the number listed on the Quick Facts and ask for the Electrical Services Department. For fast, easy ordering, tools, and helpful hints go to www.freemanco.com/store.
The following wattages are approximate and are provided to help you estimate your power usage. To assist in estimating we recommend that you refer to the name plate or stamp usually located on the back or bottom of any electrical apparatus and order the corresponding outlet for each piece of equipment to avoid tripping/power outages during the event.

The formula for wattage is voltage x amperage (120 volt x 1 amp = 120 watts), 5 - 100 watt light bulbs = (5x100 = 500 watts)

It is recommended that this equipment be placed in a closet, under a table/desk or in another location that keeps it out of sight. Please provide specific dimensions.

2. **Location and load of all outlets.** Please provide specific dimensions and wattages/amperages. *Please do not simply place an X where power is required.*

3. **Booth orientation.** Please provide surrounding aisle and/or booth numbers, particularly for island booths. Also, please try to orient your booth to the overall floor plan so that the diagram does not have to be rotated.

SAMPLE LAYOUTS

IN LINE BOOTHs
Power is run or dropped to in line booths along the back walls or drape line of multi booth sections. The “main power locations” therefore are always located at the back of in line and peninsula booths. Outlets may not be in the exact center of the back wall. 120 volt outlets are shared by back to back booths. Example: Outlet =

Electrical layouts are required whenever an outlet is needed at any other location within the booth except for the back wall. Exact measurements and/or comments that clearly indicate outlet locations must be included. Examples based on above floor plan:

20 x 20 Peninsula – Booth # 401
Order = 2-10 amp, 1-20 amp outlets

10 x 20 In Line – Booth # 409
Order = 2 x 5 amp outlets

Please place outlets in front corners of booth
ISLAND BOOTHs

Electrical layouts are always required for island booths and **must include** the following information:

1. **Main Drop.**
   Since there is no back wall in an island, the exhibitor supplies the location of the main drop, whether one or multiple outlets are ordered. When it will be the point from which power will be distributed to other outlets in the booth, a panel or other piece of electrical equipment (no larger than x x?) will be installed at the main drop. For this reason, it is recommended that main drops be located in a closet, under a table/desk or in another area that keeps it out of sight. Measurements must be provided to the main drop.

2. **Location and load of all outlets.**
   Again, dimensions must be provided to all satellite outlets along with the load of each outlet. It is best to indicate voltage, phase and amperage for all outlets once an order exceeds 120 volt service.

3. **Booth orientation.**
   Providing reference points such as surrounding aisle and/or booth numbers defines how an island booth is oriented to the overall show floor plan. In other words, which side is which? It is best to draw your layout relative to the show floor plan so that both are facing the same direction. Examples:

   ![Section of show floor plan](image)

   **20 x 20 Island – Booth #401**
   Order = 1 x 208 volt, 3 phase, 10 amp + 120 volt, 2 x 20 amp + 2 x 5 amp outlets

### ELECTRICAL

Power includes delivery of the service to one location at the rear of the booth in peninsula and inline booths. Please see the Electrical Labor order form for rates and instructions if you require outlets in other locations, have lights or electrical items to hang or erect, have orders for power of 208v or higher, or have other electrical requirements.

ELECTRICAL INSTRUCTIONS

HOW TO DETERMINE ELECTRICAL REQUIREMENTS

For Equipment
All electrical equipment is stamped or labeled with electrical ratings usually found on the back or bottom of the equipment. Verify voltage and either amperage or wattage from the information provided. Standard office and household items operate on 110/120 volt power. Machinery and equipment typically require 208 or 480 volt power.

For Lighting
Verify the wattage of the bulbs in the lights and multiply by the number of bulbs/lights.

LOCATION OF POWER IN YOUR BOOTH

In-Line and Peninsula Booths
Power will be installed in one location, typically on the floor somewhere along the back of the booth, as indicated in the following diagrams: (We cannot guarantee that the outlet will be specifically located in the middle.)

[Diagram of in-line booth with outlets marked]

If power is required in locations other than indicated above, secondary distribution will be required and billed on a time and material basis. Please complete and submit an Electrical Labor Order Form with your power order, along with a floor plan as described below.

Island Booths/Multiple Outlets
Floor plans are always required for Island Booths and orders for multiple outlet locations. The floor plan must indicate booth dimensions, surrounding booth numbers for orientation within the facility, each outlet location, required wattage or amperage and location for main drop. If power location in an island booth is not provided prior to show move-in, a location will be determined by Freeman in order to maintain delivery schedules. Relocation of the service will be charged on a time and material basis. See examples below: A grid is available at www.freeman.com/store to print as a base layout.

OTHER:
1. Labor is required for any and all electrical work over and above the installation of the main power drop. Please see the Electrical Labor form for complete details. Please complete the labor order form.
2. Dismantle labor will be automatically charged at 50% of the installation time and rounded to the nearest half hour.
3. All material and equipment provided by Freeman is for rental purposes only and remains the property of Freeman. All equipment will be removed at the close of the show by Freeman.
4. All equipment regardless of power source, must comply with Federal, State and local codes as well as any applicable local recognized electrical authorities and standards. Freeman reserves the right to inspect all electrical devices and connections to ensure compliance with all codes and proper permitting. Freeman is required to refuse connections where the exhibitor wiring is not in accordance with local electrical code and permitting.
5. Standard wall and other permanent building utility outlets or sockets are not part of booth space and may not be used by exhibitors unless electrical services have been ordered.
6. Exhibitors’ cords must be a minimum of 14 gauge 3 wire with ground and must be flat when used for floorwork. All multi-outlet devices (eg - power strips) must have circuit protection. All exposed non-current carrying metal parts of fixed equipment, which are liable to be energized, shall be grounded.
7. Exhibitors’ equipment will be modified to conform to Freeman receptacles. If an outage is the result of an exhibitors’ equipment, then a labor charge may be assessed. Labor and materials to install or change a cord cap or fix an outage will be billed on a time and material basis.
8. Exhibitors with hardwall displays must arrange for power to be installed inside the booth or provide access.
9. Power sharing is not permitted between exhibitors.
