

## CIBMTR 2016 CORPORATE CENTER VOLUMES DATASET

US transplant centers have been required to report allogeneic transplants with the CIBMTR since late 2007; reporting of autologous transplants is voluntary. It is estimated that the CIBMTR captured 80% of all autologous transplants performed in the US since 2008.

The US Center Volumes Dataset available to corporations contains center-specific pre-transplant patient-, disease-, and transplant-related characteristics data for nearly all allogeneic and a majority of autologous hematopoietic stem cell transplants (HCTs) performed in the US between 2011 and 2015. Variables in the dataset includes: center name; center location (US state), year of transplant, patient race, patient ethnicity, patient sex, and patient age (in decades) at transplant, disease, disease status at transplant (when applicable), type of donor and graft source.

- In order to protect patient anonymity, patients who received their transplants at centers that registered fewer than 20 transplants with the CIBMTR in a given year, the following data were redacted: patient race, ethnicity, gender, and age at transplant. Data were redacted only for those years where fewer than 20 transplants were performed. This impacted 1,996 (2%) of 97,636 transplants and 59 (30%) of 199 centers included in the current center volumes dataset.
- Thirty six patients from 21 centers are not present in the US Center Volumes Dataset and represent approximately <1% of the center transplant population. For these patients, the center did not provide complete data or it was not validated in time for this report. These centers are listed in Table 1.

Table 1. US Centers whose HCT recipient data are not included for certain patients in the 2016 Center Volumes Dataset		
Center Name	State	HCT Type(s) Performed
Baylor University Medical Center	TX	Autologous
Cincinnati Children's Hospital Medical Center	OH	Allogeneic
Cleveland Clinic Foundation	OH	Autologous
Comer Children's Hospital/University Of Chicago Medicine	IL	Allogeneic
Dartmouth-Hitchcock Medical Center	NH	Allogeneic
Froedtert Memorial Lutheran Hospital	WI	Allogeneic
Greenebaum Cancer Center U Of MD	MD	Allogeneic
Hackensack University Medical Center	NJ	Allogeneic and Autologous
Jewish Hospital	OH	Autologous
LDS Hospital	UT	Allogeneic
M.D. Anderson Cancer Center	TX	Allogeneic and Autologous
Miami Valley Hospital	OH	Autologous

Center Name	State	HCT Type(s) Performed
Mount Sinai Hospital	NY	Autologous
Oregon Health & Science University	OR	Allogeneic
Roswell Park Cancer Institute	NY	Autologous
Strong Memorial Hospital - Univ. Of Rochester Med Ctr	NY	Autologous
University Of Chicago Medicine	IL	Allogeneic
University Of Illinois Medical Center At Chicago	IL	Allogeneic
University Of Michigan Medical Center	MI	Allogeneic
Vanderbilt University Medical Center	TN	Allogeneic
Westchester Medical Center	NY	Allogeneic and Autologous
