

CIBMTR Corporate Membership Level

Access to database for simple analyses by the CIBMTR Information Resource Service

(Please request data via the online [CIBMTR Corporate Member Information Request Form](#))

Corporate Leaders (\$60,000)	Corporate Patrons (\$30,000)	Corporate Sponsors (\$15,000)	Corporate Partners (\$7,500)
Variables:			
Source: CRF All Patron-level variables Disease-specific pre-HCT variables	Source: TED All Sponsor-level variables Comorbidity index* Disease status prior to HCT Conditioning intensity Conditioning regimen Donor age D-R sex match D-R CMV match GVHD prophylaxis	Source: TED Number of centers Patient age at HCT Patient gender Patient race Patient ethnicity Karnofsky/Lansky score Disease Sub-disease Type of donor Graft source Time from DX to HCT Year of HCT Median FU of survivors	No access to database
Outcomes:			
Overall Survival	Overall Survival	None	
Description of Analysis:			
<ul style="list-style-type: none"> Descriptive summary of the population. Aggregate data will be presented by patient subgroups (if applicable) and predefined categories of the pre-HCT variables of interest. Analysis of overall survival will be provided as a probability (confidence interval) at specific time points (generally and if applicable: @1y, @3y, @5y). 	<ul style="list-style-type: none"> Descriptive summary of the population.
